

EYEBALL MULTIVIEW SERIES

Enhance your crane operations with the robust and versatile eyeball cameras, designed to provide additional viewpoints for critical monitoring. Whether you need a clear view of the winch or additional view points to secure surroundings.

- Effortless installation: Equipped with powerful magnets, these cameras can be quickly and securely mounted anywhere.
- Flexible integration: Our eyeball camera systems can function independently or integrated as addition to existing zoom camera setups.
- Quadview connectivity: Connect up to four additional eyeball cameras using a quadbox, and display their feeds in a split-screen or picture-in-picture configuration for simultaneous viewing.
- Switchmode compatibility: By integrating a switchbox, you can display both the eyeball and zoom camera systems on the same monitor, seamlessly switching between the two circuits for optimal control.

Eyeball multiview series can be customised in terms of cabling, junctions and monitor sizes. The set-ups can be used for 12- and 24 Volt systems.
