

BCS RECORDER

OCS-8070

The BCS Recorder

This recorder can be applied as an add-on option to all VH-series camera sets. Plug and play without additional mounts or cables. The device is designed to enhance your crane camera system with local encoding and recording of the video footage for playback and analysis purposes.

Key Features:

- Compatibility: The recorder can be added to any of our existing camera sets, ensuring flexibility and ease of use.
- High-quality recording: The recorder maintains the quality of the original footage as much as possible.
- Convenient storage and playback: Recordings are saved directly onto the SD card in MP4 format (photos in .jpg) compatible with most devices.
- Simple installation: Magnet mount and plug & play.
- Security & settings controlled: the SD slot is locked and comes with two keys to control authorised use. The remote control can be used to adjust settings and enable playback on the spot when connecting a screen to the HDMI output.

By integrating this recorder into your camera system, one can keep visual records of your crane operations, enhancing safety, security, and operational efficiency. To mount it just use the strong magnet to adhere the recorder to your monitor or cabin steel. Install by plugging into the backside of the monitor and connect the camera feed cable into the recorder. LxWxD dimensions of 107x82x29mm.

Recording capacity:

- Standard a 256 GB SD-card is included
- Around one hour per GB can be recorded using the pre-set settings
- A second SD slot (max 512 GB) gives the opportunity to increase capacity
- Snap-shot photo images can be stored as well
